Light as a Feather

Baking Powder Biscuits made by this recipe are so far ahead of ordinary baking powder biscuits that, if accepted, you will never use any other recipe. Try it the next time you run short of bread. Save this recipe.

Three cups flour; 1/4 to 1/2 cup shortening; 3 level teaspoonsful C. C. Baking Powder; about 1 cup milk or water; 1 teaspoonful salt.

Sift three times, the flour, salt and baking powder. Work into the flour the shortening, using lard or butter for shortening. Then mix to a very soft dough with the milk. The softer the biscuit enters the oven, the lighter it comes out. Never knead baking powder biscuits; press the dough into shape and roll lightly. Cut in small shapes and bake on a sheet or very shallow pan in a hot oven. In placing biscuits in the pans well apart, not allowing edges to touch. Small biscuits are better than large ones. Large biscuits do not have the proper amount of time to raise and bake.
